SUMMARY

Full-stack developer with hands-on experience in building scalable web applications, database management, and API integration. Proficient in Angular, React.js, .NET, and Node.js, with strong problem-solving, adaptability, and critical thinking skills. Passionate about delivering efficient, user-centric solutions while leveraging AI, cloud technologies, DevOps, and best development practices.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Elekon Ventures – Remotely

June 2026 – August 2026

Contributed to the development of FrequenC, a production-grade web platform, by building scalable frontend and backend solutions while collaborating in an agile software development environment.

- Developed responsive, reusable, and user-centric interfaces from Figma designs using React.js and frontend technologies.
- Built and maintained backend APIs, implement new features, and contributed to scalable application architecture.
- Collaborated with cross-functional teams using Git-based workflows, participating in code reviews and technical discussions.
- Debugged, refactored, and optimized application components to improve performance, maintainability, and user experience.

Technologies: React.js, TypeScript, Tailwind, Node.js, NestJs, MongoDB, Socket.IO, GSAP, REST APIs

Backend Team Lead Intern | URM Enroll – Remotely, Berlin

January 2026 – February 2026

Leading backend architecture and AI integration for a multi-tenant SaaS platform connecting international students and nurses with German universities and hospitals.

- Architected PostgreSQL 16 database with Row-Level Security (RLS) ensuring secure multi-tenant isolation and GDPR-compliant data handling across 10+ core entities.
- Built AI-powered CV parsing pipeline using Edge Functions (Deno/TypeScript) and LLM integration, achieving 70% structured data extraction accuracy.
- Developed weighted matching engine (0–100 scoring) combining eligibility constraints and performance-based criteria to optimize applicant placement.
- Implemented automated eligibility verification and compliance tracking system processing 500+ documents with audit logging.

Technologies: Supabase, Deno, TypeScript, PostgreSQL, NestJs, REST API's

Full Stack Developer Intern | ADADK – Remotely, Berlin

December 2025 – January 2026

Engineered an IoT-based smart water management system that enabled real-time monitoring and automated leak detection for property managers, reducing water waste incidents by enabling proactive alerts and cutting response time.

- Developed RESTful APIs for IoT device lifecycle management, enabling seamless telemetry ingestion and real-time processing for 100+ connected devices.
- Architected PostgreSQL relational database supporting multitenancy across users, properties, zones, devices, and technicians with optimized query performance.
- Built real-time alerts and notifications using WebSockets (Socket.io) and Redis delivering instant notifications for anomaly detection and threshold breaches.
- Implemented enterprise-grade security JWT authentication, Google OAuth, and role-based for secure multi-role access control.

Technologies: NestJs, TypeScript, PostgreSQL, TypeORM, Socket.io, Redis, JWT, OAuth

Project Management and Support Intern | INJAZ Lebanon – Beirut, Lebanon

November 2025 – December 2025

Streamlined program operation and supplier coordination for youth entrepreneurship initiatives, improving project delivery timelines and reducing manual overhead process automation and systematic tracking.

- Maintained accurate Excel tracking sheets, improving data accuracy and reducing errors by 10%, which enhanced program coordination.
- Coordinate supplier documentations and student registrations, ensuring smooth completion of program requirements on schedule.
- Produced reports to help program manager track progress and make timely decision.
- Supported daily operations (data entry, scheduling, documentation), improving workflow efficiency and team productivity.

Technologies: Google Sheets API, Excel, Data Analytics

Full Stack Developer Intern | IDS Fintech – Beirut, Lebanon

July 2024 – August 2024

Contributed to fintech application development focused on improving transaction processing performance and user engagement and user engagement for banking clients, delivering features that enhanced application responsiveness and data handling capabilities.

- Optimized database interactions and query performance using SQL, ADO.NET, Entity Framework, and Dapper, reducing API response times by 35% and improving data retrieval efficiency.
- Developed full-stack features using C#, JavaScript, JQuery, Angular and DevExtreme, delivering responsive UI components and business logic that increased user engagement by 30%.

Technologies: C#, .Net, Angular, JavaScript, jQuery, DevExtreme, SQL Server, Entity Framework, Dapper, ADO.NET, REST APIs

PROJECTS

Fillia (Award-Winning Capstone Project)

A donation and sales platform aiding crisis-affected Lebanese communities, featuring AI-powered verification, fraud detection, and personalized matching algorithms that increased donation-case matching success by 22% and accelerated case submissions by 15%.

Technologies Used: React.js (Vite), Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB Atlas, Cosine Similarity, AI (Cosine Similarity, Trust Verification, Image Validation), Docker, Hostinger, Jest.

Table Booking System

A restaurant reservation system that allows users to book tables, manage reservations, and receive real-time availability updates. Includes an admin dashboard, user authentication, notifications, and secure booking confirmation.

Technologies Used: Angular, TypeScript, HTML, CSS, Bootstrap, .NET Core, Entity Framework, ASP.NET Web API, Azure, SQL Server.

Buildings Management System

Enterprise-grade property management platform with role-based (Super Admin / Admin) authentication, enabling efficient management of residential complexes, building and administrative personnel with search, pagination, and automated admin creation workflow.

Technologies Used: Flask, SQLAlchemy, MySQL, Angular, Angular Material, JWT, REST APIs, Repository Pattern.

Waltrack – Personal Finance Expense Tracker

Financial management web application with transaction categorization, detailed expense history, and interactive data visualizations, helping users analyze spending patterns and improve budget management.

Technologies Used: ASP.NET Core MVC, C#, SQL Server, Syncfusion UI Components, HTML5, CSS3, JavaScript.

EDUCATION

Bachelor of Science in Computer Science | Al Maaref University (MU) – Beirut, Lebanon

October 2021 – February 2025

- Secured Third Place in Al Maaref University's Best Graduation Project Competition for the academic year 2024–2025, recognizing innovation, technical excellence, and impactful problem-solving.

SKILLS

Programming Languages: JavaScript, TypeScript, C#, Python, PHP (Basic).

Frontend Development: HTML, CSS, React.js, Next.js, Angular, DevExtreme, Tailwind CSS, Bootstrap, Framer Motion, Syncfusion UI.

Backend Development: Node.js, Express.js, ASP.NET, Flask, Nest.js, WebSockets (Socket.io).

Database and ORM: MySQL, SQL, MongoDB Atlas, SQLAlchemy, PostgreSQL, TypeORM, Supabase.

Tools: Git, Postman, SSMS, MySQL Workbench, Jupyter Notebook, Azure, Docker, Jira, Canva, MS Office, Redis, PhpMyAdmin, XAMPP.

Development Principles and Methodologies: MVC Architecture, SOLID Principles, RESTful APIs, Agile Methodologies (Scrum, Kanban).

Soft Skills: Problem-Solving, Adaptability, Team Collaboration, Communication, Time Management, Attention to Detail, Critical Thinking.
Languages: Arabic (native), English (fluent).

CERTIFICATES

Girls Who Excel – PWC Middle East Credential ID: Ny6k2Wv0KCZ2	June 2026
Digital Employment Readiness– The Nawaya Network Credential ID: Ncba4JSNY0A	June 2026
Prompt Engineering for ChatGPT & AI Tools – Cedar Digital Solutions Credential ID: AA25095481	January 2026
1 Million Prompter – Dubai Future Foundation Credential ID: AB6095481	September 2025
Ready4Work – INJAZ Lebanon Credential ID: AA25095481	September 2025
Generation AI – eFlow.ai, Google.org Credential ID: SxnRVzpgW6-iy	September 2025
Clean and Scalable Code – Software Engineering Excellence Credential ID: cert-dsc0d810c	August 2025
Entrepreneurship and AI – Ektidar Project Credential ID: 1R5YBnBQUxPbi	July 2025
Prompt Engineering – Tech Trendy Credential ID: pBUYmniEWcje1	July 2025
Foundational C# with Microsoft – Microsoft Credential ID: alaa_asaad-fcswm	July 2025
MERN Stack Development – Udemy Credential ID: UC-4dc27feb-8648-4a67-835a-155ecc0376ce	May 2025
Frontend Developer (React) Certificate – HackerRank Credential ID: 1c0cf525e0b	May 2025
PHP Boot Camp with MySQL – Udemy Credential ID: UC-91941e06-7bc8-464e-9278-64ac6b61e68e	December 2024
React JavaScript – Alison Credential ID: 1ymUjGYNAvTy1YwB_drC62lxmdhHQQvz5d	October 2024
